Professional Summary

Salesforce Developer with end-to-end experience designing, developing, and deploying solutions on Sales Cloud, Service Cloud, Experience Cloud, and B2B Commerce. Experienced in driving digital transformation initiatives by delivering Salesforce-based digital products that modernize customer journeys, automate business processes, and integrate enterprise systems at scale. Brings deep domain expertise in real estate business processes, including unit inventory management, sales cycle management, reservation workflows, payment schedules, and integration with government platforms. Strong background in web development (PHP, HTML, CSS, JavaScript, Bootstrap) and security model configuration, release management (Git, Azure DevOps), with 7 Salesforce certifications.

Core Skills

- Salesforce Clouds: Sales Cloud, Service Cloud, Experience Cloud, B2B Commerce Cloud
- Development: Apex Classes & Triggers, Lightning Web Components, Visualforce, Aura Components, JavaScript, Field Service Lightning(FSL)
- Web Development: PHP, HTML, CSS, JavaScript, Bootstrap, Content Management Systems
- Integrations: REST/SOAP APIs, Platform events, ERP integrations NetSuite, Fabrick Payments, Docusign
- Automation & Data: Flows, Process Builder, Workflows, Validation Rules, SOQL/SOSL, reports & dashboards
- Security: Roles, Profiles, Permission Sets, Sharing Rules, OAuth 2.0, SSO, Connected Apps, Named Credentials
- DevOps & Tools: Git, Azure DevOps, Data Loader, Workbench, sandbox and release management

Professional Experience

Salesforce Developer

Citi Developers, Dubai Jun-2026 - Present

- Designed and maintained core real estate data model in Salesforce (Project, Tower Units, Payment Plan etc) to support unit inventory tracking, off-plan sales cycles, and multi-milestone payment schedules.
- Built Apex automation to manage installment records and delegate overdue-payment processing to batch Apex, keeping collection status synchronized with payment plan milestones.
- Translated business requirements into scalable technical solutions, including a bulk-safe Apex engine replicating a multi-tier commission decision tree across sales roles and an automated installment/payment-schedule tracking system.
- Built a error-logging framework to proactively alert the development team on system errors, improving platform reliability and reducing incident response time.
- Built dashboards and reporting covering opportunity pipeline, revenue, and agent commission performance to give sales and operations teams visibility into deal flow and payout accuracy.

- Collaborated with business stakeholders to challenge requirements, evaluate Salesforce versus external-system responsibilities, and recommend scalable technical solutions aligned with long-term platform strategy.

Salesforce Developer

Altea Federation, Dubai, UAE Jan 2025 – Jun 2026

- Collaborated with product owners, solution architects, and UX designers to deliver scalable Salesforce-based digital products, coordinating UAT with business stakeholders, owning post-deployment validation, and troubleshooting production issues.
- Delivered customer-centric digital products on B2B Commerce Cloud, designing self-service digital journeys and agent-facing tools that improved end-to-end customer experience and reduced friction across the buying lifecycle.
- Build and maintain integrations with CoolSales CPQ (ERP) system via REST/SOAP APIs using asynchronous patterns, improving operational efficiency and ensuring near real-time data sync.
- Designed and configured end-to-end Inventory ERP workflows within Salesforce B2B Commerce, managing stock levels, purchase orders, and goods receipt processes synchronized with external ERP systems.
- Introduce component-based architecture for LWC/Aura, creating reusable UI components and significantly reducing future development effort and time-to-market.
- Lead frontend-focused CI/CD practices for Salesforce deployments using Git and Azure DevOps, reducing deployment-related downtime and improving release reliability.
- Translated UX/UI designs into responsive Lightning Web Components and Aura components, introducing a reusable, component-based architecture that reduced future development effort and accelerated time-to-market for new digital features.
- Acted as a primary Salesforce Support Owner, managing user access, profiles, permission sets, environment strategy (sandboxes/refreshes), and coordinating end-to-end release cycles.
- Implemented event-driven integration patterns using Salesforce Platform Events to enable real-time data synchronization between B2B Commerce and external ERP systems, reducing data latency and improving operational responsiveness.
- Developed and deployed agent-facing Service Cloud solutions, including case management workflows, service console customizations, improving agent efficiency and enabling unified customer support across web and mobile touchpoints.
- Designed, developed and maintained REST/SOAP API integrations between Salesforce and external ERP, payment and third-party systems using synchronous and asynchronous integration patterns.

Salesforce Developer

Cognizant Technology Solutions, India Dec 2021 – Dec 2024

- Developed custom workflows, validation rules, and Apex triggers/classes in agile environments, following defined SDLC and code review practices.
- Optimized front-end performance and client-side caching for high-data-volume pages, reducing data processing time and improving user experience.
- Built LWC components aligned with UX requirements and governor limits, improving usability while maintaining platform performance.
- Automated key business processes with Apex and declarative tools, reducing manual effort for business teams.
- Used Git and Azure DevOps to manage source control and deployments, resolving complex defects and improving system performance.
- Designed and implemented real-time integrations between Salesforce and external ERP via RESTful web services, ensuring data consistency across platforms.

- Modeled lifecycle from lead capture to agreement on Salesforce, providing operational transparency for sales and operations teams.
- Configured CRM workflows for broker registration and property/asset listings, supporting core revenue operations.
- Implemented e-signature integrations, improving compliance and client onboarding experience.
- Designed and maintained user permissions and access controls, ensuring data security and compliance with organizational standards.
- Developed custom reports and dashboards for management, enabling better data-driven decisions and visibility.
- Configured and maintained Salesforce Experience Cloud (Communities) portals to support broker self-service journeys, enabling external users to access property listings, submit registrations, and track commission status without agent intervention.
- Prepared technical documentation for development processes and standards, supporting knowledge transfer and onboarding.

Web Development Intern

Shopsky India Pvt Ltd, India Dec 2020 – Nov 2021

- Developed and maintained blogging websites using PHP, HTML, CSS, JavaScript, and Bootstrap, building responsive front-end interfaces and content management systems.
- Designed payment pages and integrated payment gateways, ensuring secure transaction flows and user-friendly checkout experiences.
- Built custom CMS functionality for content publishing, user management, and media handling, improving website administration efficiency.
- Collaborated with design and backend teams to translate requirements into functional web applications, gaining foundational full-stack development experience.

Certifications

- Salesforce Certified Administrator (SCA)
- Salesforce Certified Platform Developer I
- Salesforce Certified Platform App Builder
- Salesforce JavaScript Developer I
- Salesforce Certified Platform Developer II
- Salesforce Certified AI Associate
- Salesforce AI Specialist

Education

Bachelor of Technology (B.Tech.), Computer Science
Lucknow University, India 2017 – 2021 CGPA: 7.3/10
